

In our company that realizes the design, production, sales and marketing activities of Module Led, Strip Led, Bar Led and Lighting Products;

As **ZENIT LED**, we adopt the environmental management system and sustainability approach by complying with all laws and regulations in order to protect our environment and ensure its continuity.

In line with this principle, we undertake to:

Ensure continuous development and improvement by meeting all legal requirements and customer requirements related to environmental aspects,

Reduce waste generation, support recycling and recovery in a way to prevent environmental pollution and harm to human health,

Reduce and prevent unnecessary resource consumption by ensuring the most efficient use of natural resources,

Develop our environmental management system to continuously improve our environmental performance,

Continue our environmental activities within the framework of all relevant legislation and standards, with the latest information and with the participation of all our personnel, and in this context, continuously raise awareness of all our employees, suppliers and visitors on environmental issues through information flow and trainings,

Receive the contributions of all our employees, customers, business partners, investors and other stakeholders as well as our senior management in determining the scope, methods and targets of our environmental management system,

Minimize our environmental impacts by considering the life cycle approach.
